Tempest Harding applies *attention to detail* and *total quality management* to deliver Information Technology consulting services, equipment and Electronic Commerce Services. Specializing in data communication, information security, and project management, the Company offers complete solutions for commercial and government users worldwide.

As a small business, Tempest Harding maintains Government certified HUBZone (Historically Underutilized Business Zone) status. Since 1995, our consultants designed and installed networks servicing over 100,000 users in Asia, Europe and North America. Longevity and experience enable solutions that are tested and trusted.

Dun & Bradstreet reports Tempest Harding's customer satisfaction rating as 91 of 100. Customer support, responsiveness, personnel and reputation represent our highest scores. Working with other contractors to bridge the gaps between project management, cabling plant systems and IT, the Company strives to exceed expectations by furnishing, installing and testing best-of-breed routers, switches and firewalls.
